

AT05 POWDER PULVERIZER

Feature

- ◆ It adopts rotary multi-hammers structure for hammering the powder material, which makes powder to be sheared off, scraped, scattered and pass through the mesh net in order to achieve the requested fineness.
- ◆ Hammer chamber has cooling system, which effectively avoid the raw material from being thermal anaphylaxis.
- ◆ Auto screw type powder feeding.
- ◆ Hammers rotate high speed ensures the powder material well homogenized after oil spraying, it also avoid too much oil spot and the powder cake to be more soft after pressing.
- ◆ Powder bucket is automatically lifted up and down, convenient for powder discharge.

主要参数 Main parameters Blusher Powder Pulverizer

型号	Model	AT05
功率	Power	7.5KW, 7200rpm
生产能力	Capacity	20-50KG/Hour
进料	Material inlet	Screw feeding(Speed is adjustable)螺杆送料(速度可调)
锤子	Hammer	8pcs
筛网规格	Sieve size	1.0/1.5/2.0mm
